1. Installation

1.1. With your FTP client

Find the WordPress Plugin folder within the downloaded archive.

Extract the Plugin folder to your desktop.

With your FTP program, upload the Plugin folder to the wp-content/plugins folder in your WordPress directory online.

Go to Plugins screen and find the newly uploaded Plugin in the list.

1.2. From your Wordpress dashboard

Go to your Wordpress Admin Panel, and click on Plugin » Add New. Then click on the Upload Tab.

Browse the file and upload it (zip files only).

Go to Plugins screen and find the newly uploaded Plugin in the list.

2. Getting Started

Click Activate Plugin to activate it.

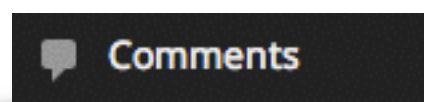

Once installed and activated, your wordpress comment sections should already be replaced by the basic commentator ones.

To customize them, please follow this paragraph instructions.

2.1. Open the settings panel

Your Wordpress Admin should have a new « Commentator » tab inside the built-in comments tab.

From their, you can open the settings panel !

2.2. Change an icon

To change an icon, we provided to you an super simple modal icon chooser.

Click on the icon to modify

▷ the modal should open.

Click on the icon you wish to use instead in the modal

▷ the modal should close and the new icon should appear

2.3. Change a color

To change a color, we provided a simple jQuery color picker, to do so :

Click on the color to modify

▷ the little color picker should appear.

Choose your color with the color picker

▷ the little box color should change to the new chosen color

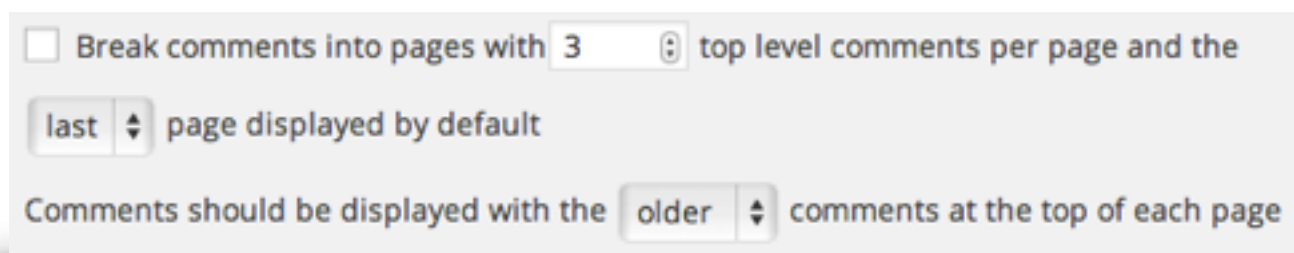

2.4. Max Threaded comment count

You can simply change the maximum possible threaded comments with the first text input. Enter simply a number from 1 to whatever you want :) !

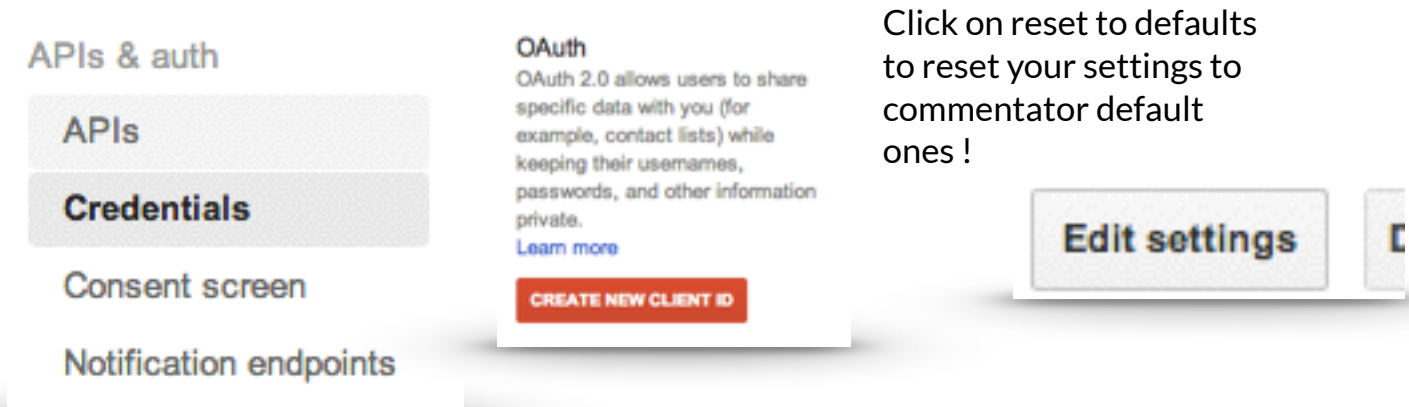

2.5. Pagination

V1.3 added comments pagination support to commentator. We decided to support the native wordpress pagination. The options are located in Settings > Discussions :

2.6. Save my settings

Don't forget to save your settings with the « save changes » button !

Then click on credentials on the left menu.

Create a new client id for your app

Edit your settings

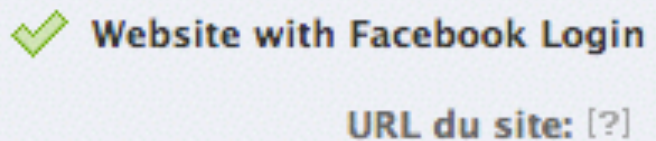

3. Social Auth

3.1. Google

To get your google api keys, you need to go at : <https://code.google.com/apis/console/#access>

A screenshot of a button with the text "+ Créer une application" in a light gray box with a thin border.

In Authorized redirect url, you must

A screenshot of a form field with a green checkmark icon on the left. The text "Website with Facebook Login" is in bold. Below it, the text "URL du site: [?]" is displayed.

add your website url + wp-content/plugins/commentator/hybridauth/?
hauth.done=Google

For my demo, I added <http://yukulelix.com/commentator/wp-content/plugins/commentator/hybridauth/?hauth.done=Google>

Go to Consent screen on the left menu and add a name to your app.

Now just copy your Client ID and Client Secret in Commentator Settings !

3.2. Facebook

To use facebook, you need a developer account.

Go there : <https://developers.facebook.com/apps>
to create it.

A screenshot of a blue button with the text "Create a new application" in white.

Create your first app

Fill the form and add at the end :
with your base URL

I added <http://yukulelix.com/commentator/> for my demo

You can now add your app id and app secret in commentator settings

3.3. Twitter

To use twitter, go to : <https://dev.twitter.com/apps>.

Create a new app :

In the settings tab, fill website and callback url with your website base, I used <http://yukulelix.com/> for my demo.

Check the box : « Allow this application to be used to Sign in with Twitter »

In the oath tool tab, copy your Client ID and Client Secret in Commentator Settings !

3.4. Linkedin

To use twitter, go to : <https://www.linkedin.com/secure/developer>

Create a new app.

fill website url with your website base, I used <http://yukulelix.com/> for my demo.

Copy your ID Key and Secret Key in Commentator Settings !

4. Features request and further help

If you need anything that's not provided by this documentation or if you have any features request, please contact me at support@yukulelix.com !

Cheers !
