Template Manual

Kapena HTML

Thank You :)

Thanks for purchasing template and for supporting our work. Kapena is our new fancy template. Responsive, clean and professional look with sleek design will satisfy all your needs.

You will need basic HTML, CSS, jQuery skills to edit Kapena HTML. We will try to help you out with this documentation.

HTML Structure

Kapena consist several HTML files

- index.html - Home page
- home-box.html
- about.html
- service.html
- blog.html
- single.html
- portfolio-1.html
- portfolio-2.html
- portfolio-4.html
- portfolio-5.html
- portfolio-6.html
- portfolio-7.html
- team.html
- contact.html

Home Page index.html

On Home section are placed portfolio items. Code for one item looks like this:

```
<li class="grid-item element-item p_two_third">

  <a class="item-link" href="portfolio-1.html">

    

    <div class="portfolio-text-holder">

      <p class="portfolio-title">

        Monochromatic

      </p>

      <p class="portfolio-desc">

        BRANDING

      </p>

    </div>

  </a>

</li>
```

Important class is **p_two_third** - if item has this class, it will be **66.666%** with. There are also **p_one_third** class for **33.333%** width and class **p_one** for **100%** width element.

Service Page

On Service page you will find code for text slider, like this:

```
<script>
var textSlider_speed = "2000";
var textSlider_auto = true;
</script>

<div id="textSlider" class="text-slider-wrapper relative swiper-container">
  <div class="swiper-wrapper text-slider slider">
    <div class="swiper-slide">
      <div class="slider-text-holder">
        The goal of a designer is to listen, observe, synthesize, and glean
        insights that enable him or her to make the invisible visible
      </div>
    </div>

    <div class="swiper-slide">
      <div class="slider-text-holder">
        The goal of a designer is to listen, observe, synthesize, and glean
        insights that enable him or her to make the invisible visible
      </div>
    </div>
  </div>

  <div class="swiper-pagination swiper-pagination-textSlider dots"></div>
</div>
```

If you need one more text slider per page, duplicate that code and change “**textSlider**” string with **textSlider2** :

```
var textSlider2_speed = "2000";
var textSlider2_auto = true;
<div id="textSlider2" class="text-slider-wrapper relative swiper-container">
```

and in pagination:

```
<div class="swiper-pagination swiper-pagination-textSlider2 dots"></div>
```

Image Slider Settings

Here you will find code for slider image. Slider image can have a several configurations - it can have “**scrollbar pagination**” or “**dots pagination**”, also it can show **one** image or **several images** at same time. There is also option to set a **gap** between images.

Case 1 (on About Page - image slider with scrollbar pagination and one visible image):

```
<script>
var slider_speed = "2000";
var slider_auto = "false";
var slider_items = "1";
var slider_gap = "0";
</script>

<div id="slider" class="image-slider-wrapper relative swiper-container">
  <div class="swiper-wrapper image-slider slider">
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>
  </div>
  <div class="clear"></div>
</div>

<div class="swiper-scrollbar swiper-scrollbar-slider"></div>
```

Case 2 (on portfolio-6.html - image slider with dots pagination and one visible image):

```
<script>
var slider_speed = "2000";
var slider_auto = "false";
var slider_items = "1";
var slider_gap = "0";
</script>

<div id="slider" class="image-slider-wrapper relative swiper-container">
  <div class="swiper-wrapper image-slider slider">
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>
  </div>
  <div class="clear"></div>
</div>

<div class="swiper-scrollbar swiper-scrollbar-slider dots"></div>
<div class="swiper-scrollbar swiper-scrollbar-slider dots"></div>
```

Case 3 (on portfolio-5.html - image slider with dots pagination and 3 visible image and no gap):

```
<script>
var slider_speed = "2000";
var slider_auto = "false";
var slider_items = "3";
var slider_gap = "0";
</script>

<div id="slider" class="image-slider-wrapper relative swiper-container">
  <div class="swiper-wrapper image-slider slider">
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>

    <div class="swiper-slide">
      
    </div>
  </div>
  <div class="clear"></div>
</div>

<div class="swiper-scrollbar swiper-scrollbar-slider dots"></div>
<div class="swiper-scrollbar swiper-scrollbar-slider dots"></div>
```

Case 4 (on portfolio-2.html - image slider with scrollbar pagination and 2 visible image and gap between):

```
<script>
var slider_speed = "2000";
var slider_auto = "false";
var slider_items = "2";
var slider_gap = "50";
</script>

<div id="slider" class="image-slider-wrapper relative swiper-container">
  <div class="swiper-wrapper image-slider slider">
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>
    <div class="swiper-slide">
      
    </div>
  </div>
  <div class="clear"></div>
</div>

<div class="swiper-scrollbar swiper-scrollbar-slider"></div>
```

Team Page

Here you will find the code for Team member, like this:

```
<div class="member one_third">
  
  <div class="member-info">
    <div class="member-name">
      PETRA WALL
    </div>
    <div class="member-social-holder">
      <p>
        Quisque feugiat condimentum neque et mattis
      </p>
      <div class="social">
        <a href="#">
          <i class="fa fa-google-plus-square"></i>
        </a>
      </div>
      <div class="social">
        <a href="#">
          <i class="fa fa-dribbble"></i>
        </a>
      </div>
      <div class="social">
        <a href="#">
          <i class="fa fa-instagram"></i>
        </a>
      </div>
    </div>
  </div>
</div>
```

As you see, there are fontawesome icons. You can change it with any other image from here <https://fontawesome.com/v4.7.0/>

Mail Configuration

Note: Do not remove any quote or double quote signs while doing this.

One notice: this will be functional only on your server, php file can not be executed on your local computer.

Just add your own email address here in your config.php file.

```
//SITE GLOBAL CONFIGURATION
```

```
$email = "your@email.here"; //<-- Your email
```

Source & Credits

Special thanks to creators and contributors of these awesome libraries, we couldn't done this without them.
