Plugin Installation

There are two ways to install the plugin.

Steps to follow to install plugin via WordPress uploader

- Download **Easy Social Share Button for WordPress** from CodeCanyon on your device
- Unzip the file and find folder named **webinstall**
- Upload zip file in this folder via WordPress admin panel
- Plugins -> Add New -> Upload -> Choose file -> Find **webinstall** folder open it, choose **easy-social-share-buttons3.zip** and press Open-> Install Now -> Activate Plugin

Steps to follow to install plugin via FTP

- Download **Easy Social Share Button for WordPress** from Codecanyon on your device
- Unzip the file and find folder named **easy-social-share-buttons3**
- Upload **easy-social-share-button3** folder to your WordPress plugins directory (**/wp-content/plugins/**)
- Activate from WordPress menu Plugins section

A new option will appear in WordPress admin menu: **Easy Social Share Buttons**, where you can configure plugin settings.

Updating from version 2.x or 1.x

We made version 3 of product from the ground up and there are changes in settings that cannot be automatically moved between versions. The new version 3.0 comes with new folder easy-social-share-buttons3 and new settings place which allows easy to move between version 2 and version 3 which can be installed and configured on server same time but only one of them should be active.

We suggest to deactivate all previous version of plugin before proceeding with version 3.0 install.

If after activation of plugin previous version of Easy Social Share Buttons for WordPress is still active you will see this message:

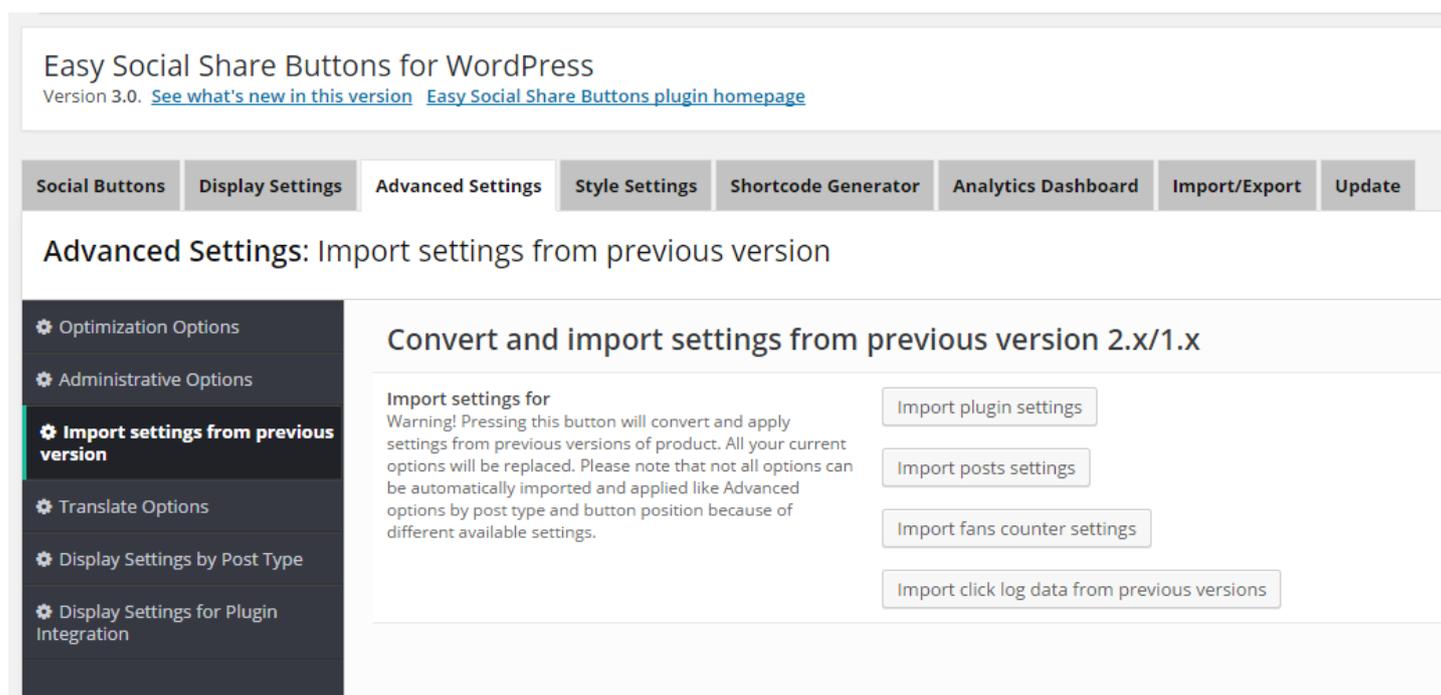

In this case click on Click here to go to installed Plugin list and deactivate all version of Easy Social Share Buttons that are less than 3.0.

After new version activation you will also see this message in your WordPress dashboard

This message appears because plugin detects your previous options and suggest to convert them where this is possible (you can click Dismiss button and proceed to manual options set). When you click the button for conversion you will get a screen with the following possible options:

Easy Social Share Buttons for WordPress
Version 3.0. [See what's new in this version](#) [Easy Social Share Buttons plugin homepage](#)

Social Buttons Display Settings **Advanced Settings** Style Settings Shortcode Generator Analytics Dashboard Import/Export Update

Advanced Settings: Import settings from previous version

Optimization Options
Administrative Options
Import settings from previous version
Translate Options
Display Settings by Post Type
Display Settings for Plugin Integration

Convert and import settings from previous version 2.x/1.x

Import settings for
Warning! Pressing this button will convert and apply settings from previous versions of product. All your current options will be replaced. Please note that not all options can be automatically imported and applied like Advanced options by post type and button position because of different available settings.

Import plugin settings
Import posts settings
Import fans counter settings
Import click log data from previous versions

- **Import plugin settings:** this will convert previous options from plugin and apply them to new version. Please note that currently setting that are set by post type cannot be converted. For

all other not converted options please report to appscreo@gmail.com and we will improve the conversion

- Import post settings: click this button if you use previously visual settings on post/page via Easy Social Share Buttons Advanced.
- Import fans counter settings: click this button to import your previous fans counter settings (where this is possible)
- Import click log data from previous version: version 3 comes with new click log engine and dashboard. Click this button to import all previous click data you have. For data before version 3 you will not be able to see statistics by button position and device type

Quick Access to Documentation

To get access to plugin documentation click on Documentation button that is available inside plugin settings.

The screenshot shows the 'Easy Social Share Buttons for WordPress' plugin settings interface. At the top, there are links for 'Quick Setup Wizard', 'Documentation', and 'Support Center'. Below this is a navigation menu with tabs for 'Social Buttons', 'Display Settings', 'Advanced Settings', 'Style Settings', 'Shortcode Generator', 'Analytics Dashboard', 'Import/Export', and 'Update'. The main heading is 'Social Buttons: Social Sharing: Template & Style', with an 'Update Settings' button on the right. A left sidebar contains a menu with options like 'Social Sharing', 'Template & Style', 'Social Networks', 'Additional Network Options', 'Counters', 'Network Names', 'Analytics', 'Sharing Optimization', 'Custom Share', 'MyCred Integration', 'Like, Follow & Subscribe', 'Social Following (Fans Counter)', and 'Social Profiles'. The 'Template & Style' section includes: 'Buttons Style' (a dropdown menu set to 'Display share buttons as icon with network name appear when button is pointed'), 'Buttons Align' (a dropdown menu set to 'Left'), and 'Template' (radio buttons for 'Default', 'Metro', 'Modern', and 'Round'). Each template option shows a preview of social sharing buttons for Facebook, Twitter, Google+, and Pinterest. A note at the bottom states: 'Round style works correct only with Hide Social Network Names: Yes. If this option is not set to Yes please change its value or template will not render correct.'
