## Description:

**Galaxy Funder** is a **WooCommerce Crowdfunding System Plugin**. It supports both backend Campaign creation for admin and Frontend Campaign submission for members. With Galaxy Funder, you can run a full fledged Crowdfunding site or add Campaigns for Crowdfunding on top of your existing WooCommerce Shop. All Payments are handled by WooCommerce. Galaxy Funder doesn't do anything related to the Payment handling of the WooCommerce Plugin.

Two types of Crowdfunding Campaigns are supported i.e. Fundraising by Crowdfunding and Product Purchase by Crowdfunding. **Fundraising by Crowdfunding** is the regular type of running a Crowdfunding Campaign for raising funds. **Product Purchase by Crowdfunding** can be used if a buyer wants to buy a Product from your WooCommerce shop by raising funds through Crowdfunding.

Email Notifications available for **Campaign Submission, Campaign Approval, Campaign Rejection, Campaign Deletion and Campaign Completion**. Shortcodes supported for Email Templates. Add **Perks/Rewards** rules for each Campaign. Also Perks/Rewards can be a Product from your WooCommerce Shop i.e. you can give the contributor a Product from your shop as a Perk/Reward. Campaigns can be closed based on **Target date, Target goal or Campaign never ends**. **Shortcode Generator** for creating Shortcodes for each Campaign.

**Galaxy Funder** is a **Very Comprehensive Crowdfunding Plugin** and you might have to read the documentation a few times and play with the Plugin for some time to get a good hold of the Plugin's working and functionalities.

## Features:

- **Complete and Powerful Crowdfunding System**
- Built on **Top of WooCommerce**
- **Perk/Reward Rule** Feature
- Crowdfunding Type – **Fundraising by Crowdfunding / Product Purchase by Crowdfunding**
- **Front End Campaign Submission** for Members
- **Back End Campaign Creation** for Admin
- **Mailing Options** for **Campaign Submission, Approval, Rejection, Deletion and Completion**
- Each Campaign can show the **Contributor Table** as per Admin Settings
- Each user can see their **Campaigns in their My Account Page**
- **Campaign End Method** – **Target Date, Target Goal and Campaign Never Ends**
- **Perk Name and Perk Amount** in Contribution Table with Show/Hide
- **Shop Product** can be selected for the **Perk/Reward**
- **Confirm Dialog Box** for Removing Perk Rule from Front End
- **Custom Success/Error Messages** for Front End Campaign Submission
- **Perk Table** Settings are **Customizable**
- **Perk Error Message** in Error Message Settings
- **Shortcode Generator** to Show the Campaign anywhere in **Page, Post, Sidebar** etc
- **Shortcode** to list **My Campaigns** for each Member
- Tables are **Responsive, Searchable, Sortable and Page Size adjustable**

- **Inbuilt/Custom Design using CSS**
- **Extensive Customization Options**
- **Translation Ready**
- and more

## How to Install:

There are two ways to install the Plugin. One is the Automatic Installation and another is the Manual Installation.

### *Automatic Installation:*

- Automatic Installation is the easiest option as WordPress handles the file transfers and you don't even have to leave your web browser. To do an automatic install of Galaxy Funder, log in to your WordPress admin panel and go to: **Plugins -> Add New**.
- In the **"Upload"** field browse Plugin zip folder "galaxyfunder.zip" and click upload. You can install it by simply clicking **Install Now**. After clicking that link you will be asked to **Activate Plugin or Return to Plugins Page**. Click Activate Plugin and the installation will automatically complete.

### *Manual Installation:*

- Unzip the Plugin zip file ("galaxyfunder.zip").
- Using an FTP program or your hosting control panel, upload the unzipped Plugin folder to your WordPress installation's **wp-content/plugins** directory.
- The Plugin works once you click **"Activate"**.
- Go to **Woocommerce → Galaxy Funder**

## Steps to Create a Crowdfunding Campaign:

A Crowdfunding Campaign can be created from **Backend by the Admin** and can also be created from the **Frontend by the Members**. First let us look into the Backend Campaign creation followed by the Frontend Campaign creation. Each Campaign creation is similar to WooCommerce Simple Product creation. In the Simple Product Page you have the option to Enable Galaxy Funder which when checked ON will turn the Simple Product into a Crowdfunding Campaign.

### **1. Create the Campaign from Backend by Admin**

After Installing the Plugin go to Product → Add New Product

Create a **Simple Product** in WooCommerce and **enable check box for "Enable Galaxy Funder"** which will turn the Simple Product into a Crowdfunding Campaign. Enter the Minimum Price, Maximum Price and Recommended Price (which are all optional) for the Crowdfunding Campaign. Target Price and Target End Selection are fields. **Target Price** is the Campaign Goal amount. **Target End Selection** is used to select different ways of ending the Campaign like based on Target Date reached, Target Goal reached

and Campaign Never Ends. Please note that you **must enter the regular price value as 0 or some other value, only then Galaxy Funder Plugin will display the Contribute button.**

Now Each Campaign has an option to create the **Perk/Reward**. You can enter the data like perk name, perk amount, description, max count for perk claims and estimated delivery. These customizations can be done in both backend as well as frontend.

Now Galaxy Funder supports two types of Crowdfunding Campaigns.

**1) Fundraising by CrowdFunding**

- It is the regular type of running a Crowdfunding Campaign for raising funds

**2) Product Purchase by CrowdFunding**

- If someone wants to buy a product in your site but he/she doesn't have money to buy and hence buyer can create a Crowdfunding campaign to buy the product. The buyer can then promote the campaign with his/her friends for funding. Once the goal amount which is the product price is reached then the product is automatically added to the campaign creator's My Account page.

Check the below picture to Select Crowdfunding Type

The screenshot displays the 'Product Data' section of a WordPress admin interface. At the top, there's a dropdown for 'Simple product' and checkboxes for 'Virtual' and 'Downloadable'. Below this is a sidebar with links: General, Inventory, Shipping, Linked Products, Attributes, and Advanced. The main area shows fields for 'SKU', 'Regular Price (\$)' (set to 0), and 'Sale Price (\$)'. There's a 'Schedule' link next to the Sale Price field. A checkbox labeled 'Enable Galaxy Funder' is checked, with a note: 'Enable Galaxy Funder if you want users to contribute for your job by donating money'. The 'CrowdFunding Type' dropdown is open, showing two options: 'Fundraising by CrowdFunding' (selected) and 'Product Purchase by CrowdFunding'. At the bottom, there's a 'Custom Fields' section.

If you select **Fundraising by CrowdFunding** then see the below screenshot

Inventory

Hide Target Price

☐

Campaign End Method

Target Goal

Target Goal

Target Date

Campaign Never Ends

Custom Fields

Name	Value
------	-------

Go to the Inventory Tab and **Check ON Sold Individually** Option so that the Quantity option is not visible in the Campaign Page as this is not required for a Crowdfunding Campaign.

The screenshot shows the 'Product Data' tab in WooCommerce. The 'Simple product' dropdown is selected. The 'General' tab is active. The 'Manage stock?' checkbox is unchecked. The 'Stock status' dropdown is set to 'In stock'. The 'Allow Backorders?' dropdown is set to 'Do not allow'. The 'Sold Individually' checkbox is checked, with the description 'Enable this to only allow one of this item to be bought in a single order'.

Now Creating a Perk/Reward is easy

The screenshot shows the 'Create Perk Rule' form. The 'Name of Perk' field is 'Perk 1'. The 'Choose Products' dropdown is 'Wrist Watch'. The 'Perk Amount' field is '500'. The 'Description' field contains the text 'Claim this Perk by Donating \$500 and we will send you a Beautiful Wrist Watch'. The 'Perk Claim Max Count' field is '200'. The 'Estimated Delivery on' field is '12/30/2014'. There is a 'Remove Perk Rule' button and an 'Add Perk Rule' button.

## 2. Create the Campaign from Frontend by Members

Create a new Page and insert the Shortcode **[crowd\_fund\_form]** to display the Campaign Form in Front End. In the WooCommerce -> Galaxy Funder -> Frontend Submission you can find all the options to customize this Frontend Submission Form.

Once the new Campaign is submitted by a Campaigner, it becomes available for Moderation in the backend. The Admin can accept or reject the Campaign. **Publishing** the Simple Product (Campaign) is equivalent to **Approving the Campaign**. **Move to Trash before publishing** is equivalent to **Rejecting the Campaign**. **Move to Trash after publishing** is equivalent to **Deleting the Campaign**. Campaigner can receive notification email (depending on Plugin Settings) when the product is approved, rejected, completed or deleted.

## How To Add a Manual Contribution by Admin:

If an offline contribution is made for a Campaign and the Admin can add this Manual Contribution i.e. Contribution for Campaign without going through the payment process.

Following steps should be done to create the contribution by admin through Add Order

### 1) Go to **WooCommerce**→ **Orders**→**Add Order**

**Add New Order**

Screen Options Help

**Order Details**  
Order number #120.

**General Details**  
Order date: 2014-05-24 @ 10:47  
Order status: pending  
Customer: Guest

**Billing Details**  
Address: No billing address set.

**Shipping Details**  
Address: No shipping address set.

**Order Items**

0  
Calculate Total

**Order Notes**  
There are no notes for this order yet.  
Add note  
Customer note Add

Thank you for creating with WordPress. Version 3.9.1

- 2) Change the **Order status to Completed**. If the Order is on behalf of an **existing user** then search the customer name in the **customer dropdown**. If not **create a new user account**.
- 3) In the Order Details **Second and Third Columns** are needed to fulfill the order, so add the information for billing details and shipping details (if needed)
- 4) In Order Items Meta Box, Add the Campaign ( Galaxy Funder Campaigns ) for which you want to contribute. Below screenshot shows adding items to the Order

**Order Items**

Item	Qty	Total
Actions	#14 - Galaxy Campaign	Add item(s) Add fee

- 5) After Adding the Item you can see the Total field of Order Items which you can Edit as shown in the following screenshot

The screenshot shows a table titled "Order Items" with columns "Item", "Qty", and "Total". A single row is visible for "Galaxy Campaign" with a quantity of 1. To the right of the table, there are input fields for "Subtotal: [?]" and "Total: [?]", both containing the value 25. Below the table, there is an "Add meta" button, an "Actions" dropdown menu, a search bar labeled "Search for a product...", and two buttons: "Add item(s)" and "Add fee".

- 6) Add the Contribution Amount in the Total field of Order Items

This screenshot is similar to the previous one, but the "Total" field for "Galaxy Campaign" now shows 5000. The "Subtotal: [?]" field still shows 25. The rest of the interface, including the "Add meta" button, search bar, and "Add item(s)" and "Add fee" buttons, remains the same.

- 7) After adding the contribution amount like in above screenshot, to complete click calculate total in the right side of the order items

The screenshot shows a section titled "Order Totals". It contains three main sections: "Shipping" with a link "+ Add shipping cost [?]", "Order Discount [?]" with an input field containing "0", and "Order Total" with an input field containing "5000.00". At the bottom right, there is a prominent orange button labeled "Calculate Total".

## 8) Finally Save the Order and you are done adding a Manual Contribution

## 9) Now you can see the newly added Manual Contribution in the contributor list in frontend

## How To Delete a Contribution from Single Product Page:

Deleting Contribution from Single Product Page is done by deleting the completed order. For all Crowdfunding Campaigns (Products) an order is created for each Contribution (Payment). When the order status is changed from any status to completed status then Galaxy Funder updates all values such as the Amount Raised, Funder Count etc.

Here is the example screenshot of how it works out exactly.

In the above screenshots you can see two contributions by two funders, which is 5000 and 2500. If you want to delete the 5000 Contribution from the single product page and update the funders count, then Go to Admin Settings find 5000 amount order.

## How to Send Contribution by PayPal Directly to Campaigner:

Sending Full Payment to Campaigner directly after checkout via PayPal. As of now Sending Full Payment to Campaigner is support only with **PayPal Standard Gateway**. It works if the Campaign Creator has provided the PayPal Email, else the PayPal Payment will be sent to Admin's PayPal.

Here are the Steps to Send a Contribution by PayPal directly to Campaigner

**Step 1:**

**Option to enable or disable Send Full Payment to Campaigner is available in Payment Tab.**

**WooCommerce → Galaxy Funder → Payment**

The screenshot shows the 'PayPal Settings' section within the 'Payment' tab of the WordPress admin dashboard. The 'Send Payment to Campaign Creator if PayPal ID is Provided' checkbox is currently unchecked. Below the checkbox are two buttons: 'Save changes' (orange) and 'Reset' (white). The top navigation bar includes tabs for General, Single Product Page, Shop Page, Frontend Submission, My Account Page, Mail, Campaigns, Error Message, Shortcode Generator, and Payment. A 'Help' dropdown is visible in the top right corner. The footer of the settings page includes the text 'Thank you for creating with WordPress.' and 'Version 3.9.1'.

By Default Checkbox value will be unchecked and if admin wants to send a full payment to campaign creator then it should be checked.

**Step 2:**

**Check ON the Option to Send Payment to Campaign Creator if PayPal Email is provided by the Campaign Creator**

GeneralSingle Product PageShop PageFrontend SubmissionMy Account PageMailCampaignsError MessageShortcode GeneratorPaymentHelp ▾

Your settings have been saved.

PayPal Settings

Send Payment to Campaign Creator if PayPal ID is Provided☒ PayPal Payments are Directly Sent to Campaign Creator

Save changesReset

Thank you for creating with WordPress.

Version 3.9.1

### Step 3:

**From a Frontend Campaign the Campaign Creator should have entered PayPal Email in order to receive the full payment directly.**

**Note: If Campaign PayPal Email is left empty then the PayPal Payment will be sent to Admin PayPal Email when the Checkout is done using PayPal Standard Gateway**

Recommended Contribution

Description

Add Perk Rule

Featured Image

No file selected.

Enter your PayPal ID

Submit Campaign

**Step 4:**

**Or If the Campaign is created by Admin/Shop Owner then the Admin has to enter the Campaigner PayPal Email in the Product Page.**

## How To Split the Contribution by PayPal between Admin and Campaign Creator:

Galaxy Funder Plugin gives an Option to Split the Payment between a maximum of 6 PayPal Accounts. You can also specify how much percentage should be divided between these 6 PayPal Accounts. You can use this to Split the PayPal Payment (Contribution) between the Admin and Campaign Creator. Galaxy Funder Plugin has the Payment Gateway called Galaxy Funder - PayPal Adaptive Split Payment Gateway which is handling Split Payment in Parallel Mode and Chained Mode. By Default called Galaxy Funder - PayPal Adaptive Split Payment Gateway will Support Chained Mode.

**You can see the Customization for PayPal Adaptive in Default WooCommerce Payment Gateways**

**WooCommerce → Settings → Checkout → Galaxy Funder – PayPal Adaptive Split Payment for Customization**

**You can see the different Settings options for Galaxy Funder – PayPal Adaptive Split Payment in the below screenshot**

The screenshot shows the 'Galaxy Funder - PayPal Adaptive Split Payment' settings page. At the top, there are tabs for 'General', 'Products', 'Tax', 'Checkout', 'Shipping', 'Accounts', and 'Emails'. The 'Checkout' tab is active. Below the tabs, there is a breadcrumb trail: 'Checkout Options | BACS | Cheque | Cash on Delivery | Mijreh Checkout | PayPal | Galaxy Funder - PayPal Adaptive Split Payment'. The main heading is 'Galaxy Funder - PayPal Adaptive Split Payment'. The settings are as follows:

- Enable/Disable:** A checkbox labeled 'Galaxy Funder - PayPal Adaptive Split Payment' is checked.
- Payment Mode:** A dropdown menu is set to 'Chained'.
- Title:** A text field contains 'PayPal Adaptive - Galaxy Funder'.
- Description:** A text area contains 'PayPal Adaptive Payment for Galaxy Funder'.
- PayPal Email:** A text field is empty.
- Percentage for Admin:** A text field contains '30'.
- PayPal Application ID:** A text field is empty.
- PayPal Security UserID:** A text field is empty.
- PayPal Security Password:** A text field is empty.
- PayPal Security Signature:** A text field is empty.
- Payment Cancel URL:** A text field is empty.
- PayPal Adaptive sandbox:** A checkbox labeled 'Enable PayPal Adaptive sandbox' is checked. Below it, a note says: 'PayPal Adaptive sandbox can be used to test payments. Sign up for a developer account [here](#).'

At the bottom left, there is an orange 'Save changes' button. At the bottom right, it says 'Version 3.9.1'. At the bottom left, there is a small text: 'Thank you for creating with WordPress.'

- 1) Enable Galaxy Funder - PayPal Adaptive Split Payment by Check the Option Enable/Disable**
- 2) Select the Payment Mode as Chained or Parallel.**
- 3) Title for PayPal Adaptive Payment which is shown at Checkout Page.**
- 4) Description of PayPal Adaptive which will be displayed in Checkout Page.**
- 5) Enter PayPal Email of Admin which is considered as Primary Email.**
- 6) Percentage for Admin in this field, enter the value of percentage between 0 to 100 (Not more than 100) Note: Enter Values without Percentage Symbol.**
- 7) PayPal Application ID is needed in order to get this option to Work. Enter your PayPal Application ID in this field.**
- 8) PayPal Security User ID is necessary for PayPal Adaptive Payment. Enter PayPal Security User ID in this field.**
- 9) PayPal Security Password is also needed for PayPal Adaptive Payment. Enter PayPal Security Password.**
- 10) PayPal Security Signature is mandatory for PayPal Adaptive Payment. Enter PayPal Security Signature is required.**

- 11) Payment Cancel URL to return to this URL if you cancel the Payment in PayPal Adaptive Payment Gateway.
- 12) Test PayPal Adaptive Payment Gateway then Enable this Option and Test using PayPal Sandbox.

## Parallel Mode:

PayPal Adaptive Payment supports different Modes such as Parallel Mode and Chained Mode.

Parallel Mode in PayPal Adaptive sends the Payment to Admin and Campaign Creator in one step.

## Settings Page:

After installing the Galaxy Funder you can see the following

### 1. WooCommerce -> Galaxy Funder

The screenshot shows the 'Galaxy Funder' settings page within the WooCommerce admin interface. The 'General' tab is selected, showing various configuration options. At the top, there's a navigation bar with tabs: General, Single Product Page, Shop Page, Frontend Submission, My Account Page, Mail, Campaigns, Error Message, Shortcode Generator, and Payment. A 'Help' dropdown is on the right. The main content area is divided into sections: 'Add to Cart Button Settings' with a text input for 'Add to Cart Button Label' (set to 'Contribute') and radio buttons for 'Redirect after Contribution' (selected: 'Checkout Page', unselected: 'Cart Page'); 'Campaign Out of Stock Settings' with a text input for 'Out of Stock Label' (set to 'Campaign Closed'); 'Display Settings' with a dropdown for 'Show Campaigns in Shop Page' (set to 'Show') and a descriptive note; 'Restriction for Cart' with a dropdown for 'Don't Allow Other Products to Cart when Cart Contain CrowdFunding Campaign' (set to 'Enable') and a descriptive note; 'Cart Error Message' with a text area containing 'Multiple Items are not Allowed when cart contain CrowdFunding Campaign Product'; and 'Troubleshoot' with radio buttons for 'Load Template' (selected: 'From Plugin', unselected: 'From Theme'). At the bottom, there are 'Save changes' and 'Reset' buttons. A footer note says 'Thank you for creating with WordPress.' and the version 'Version 3.9.1' is displayed.

### Add to Cart Button Settings

Here you can find controls for customizing the Add to Cart Button.

#### Add to Cart Button Label

Set the label of the Add to Cart Button here

#### Redirection after Contribution

Set the option of where the page should be redirected to after clicking the Contribute (Add to Cart) Button.

#### Out of Stock Message

Set the message which needs to appear in the front end when the Product is Out of Stock which is same as Campaign getting closed.

## 2. WooCommerce Galaxy Funder Single Product Page

[illegible]

### **Contribution Table Settings**

Here you can set the options to Show/Hide the columns, Labels and the position where to show the Contribution Table in the Product Page

### **Perk Table Settings**

Here you can set the Labels for the Perk Table

### **Single Product Page Label**

Here you can set the Labels for the Galaxy Funder Form that appear in the Single Product Page.

### **Inbuilt Design/Custom Design – Single Product Page**

You can choose either Inbuilt Design or Custom Design.

There are 3 Inbuilt Designs for the Galaxy Funder Form that appears in the Single Product Page. You can choose any one.

You can also go for the Custom Design in which case you will have to input your own CSS in the Custom CSS Text Area. You can find the CSS Elements which can be customized from the Inbuilt CSS (Non Editable) Text Area.

### 3. WooCommerce Galaxy Funder Shop Page

The screenshot shows the 'Shop Page' settings tab in the WooCommerce Galaxy Funder plugin. The interface includes a top navigation bar with tabs: General, Single Product Page, Shop Page (selected), Frontend Submission, My Account Page, Mail, Campaigns, Error Message, Shortcode Generator, and Payment. A 'Help' dropdown is on the right. The 'Shop Page Label' section contains five input fields: 'Minimum Contribution Label' (set to 'Minimum Contribution'), 'Maximum Contribution Label' (set to 'Maximum Contribution'), 'Goal Label' (set to 'Goal'), 'Total Contribution Label' (set to 'Raised'), and 'Total Contribution Percent Label' (set to 'Percent'). Below this is the 'Choose Inbuilt/Custom Design' section. The 'Inbuilt Design' radio button is selected. Under 'Select Inbuilt Design', a dropdown menu shows 'IGG Style' with a tooltip that says 'This helps to load the inbuilt type'. The 'Inbuilt CSS (Non Editable)' section displays a code editor with CSS rules for various form elements. The 'Custom Design' radio button is unselected. Below it is a 'Custom CSS' text area. At the bottom, a message states: 'Use the Shortcode [galaxyfunder\_my\_campaign] for displaying My Campaign for Members'. There are 'Save changes' and 'Reset' buttons. The footer includes 'Thank you for creating with WordPress.' and 'Version 3.9.1'.

Version 3.0.1

Shortcode Generator is for generating Shortcodes for each Crowdfunding Campaign that you can use to list it anywhere. In order to generate a Shortcode, you need to Select Campaign by typing the Campaign name in the Text Box and the Shortcode should appear below the Shortcode Text Label. If it doesn't appear there might be a problem in displaying the Shortcode for your theme. You can use the Shortcode **[galaxyfunder\_campaign id="product id"]** where you substitute the product id with your campaign id.

### Shortcode Label

Set all the labels here for the Crowdfunding Campaigns that appear when the Shortcode is used.

### Inbuilt Design/Custom Design – Shortcode Usage

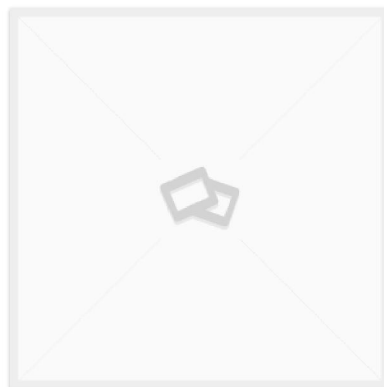

You can choose either Inbuilt Design or Custom Design.

There are 3 Inbuilt Designs for the Galaxy Funder Form that appears when Shortcode is used. You can choose any one.

You can also go for the Custom Design in which case you will have to input your own CSS in the Custom CSS Text Area. You can find the CSS Elements which can be customized from the Inbuilt CSS (Non Editable) Text Area.

## Language Translation:

Galaxy Funder is translation ready meaning you can edit the po files by which you can translate the text to any language.

The steps to do the translation are as follows. For eg let us consider translation to french

1. Download and install [Poedit](#)
2. Open the file Galaxy Funder -> languages folder -> galaxyfunder-fr\_FR.po using Poedit
3. Choose the Source text and set its corresponding French text in Translation Text Area
4. Save the changes
5. In wp-config.php define the WPLANG as French. Syntax is define ('WPLANG', 'fr\_FR');

## Requirements:

The minimum server requirements and the WordPress requirements are as follows

- PHP 5.2.4 or greater
- MySQL 5.0 or greater
- WordPress 3.4 or Higher
- WooCommerce 2.0 +

## Browser Compatibility:

**Galaxy Funder** works fine with all major browsers such as IE8.0 +, Mozilla, Chrome, Safari, Opera etc.

## Theme Compatibility:

**Galaxy Funder** should work fine with all the top themes.

## Help and Support:

Once again, thank you so much for purchasing our Plugin. Contact us by registering and opening a support ticket on [Fantastic Plugins](#).
