# Save & Share Cart for WooCommerce

---

## Part 1: Introduction

---

*** Previously know as Email Cart for WooCommerce ***

### Empower anyone using your store to Save & Share their Cart

Save & Share Cart enables anyone to save their carts - simple products, variation products, add-on products, any kind of product - and get a unique link to retrieve the cart later. Click on the link in a chat, social-media, email, bookmark or anywhere and retrieve the cart at any time. There's also a button to send the cart in a styled email showing the products, product pictures, quantities, totals and a big button to click and retrieve the content of that cart. Save & Share Cart empowers shop managers and improves the shopping experience of all your customers - here's some examples:

***Customers Save a cart to use it later***
Customers can fill their cart in the morning, then without losing that work they can save the cart to retrieve it later, the next day, or whenever they like.

***Customer send a cart to someone else to pay***
Customers can be the one to create a cart then send it to someone else who can retrieve it and checkout and pay for them.

***Pre-fill a cart to assist your customers***
Shop Managers can help their a customer via phone, chat, social-media or email by pre-filling a cart then sending it to them so they can fill their cart with one click.

***Bundle products for a promotion***
Shop Managers can pre-fill a cart, save it - giving it a memorable name - then use the unique link in a promotion on their site, in a email campaign, on social media, in an ad banners, or anywhere.

**Happy Shopping!**

# Part 2: **Documentation**

**Installing the plugin:**
- ❏ Make sure that WooCommerce is installed and working on your site. For instructions on installing the WooCommerce plugin see here.
- ❏ Install the plugin into your WordPress installation by following the normal steps here.

**Saving & Sending a Cart**

Saving and sharing a cart is done the same way for Customers and Shop Managers - by clicking on a Save & Share Cart button. The small difference is that Shop Managers will have a chance to name the cart before they save it - saved carts help identify the cart, and saved carts are not deleted (if that option is active). Here is how it works.
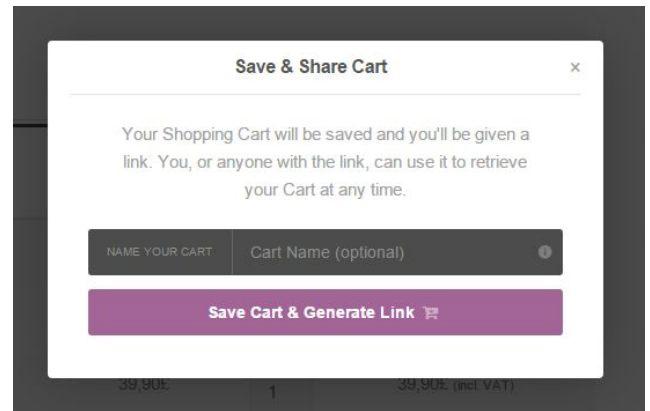

- ❏ **_Customers_** find the Save & Share Cart button on the Cart page.

- ❏ **_Shop Manages_** find the Save & Share Cart button above the list of saved carts in wp-admin
  `WooCommerce > Save & Share Cart`

❏ Once clicked you'll see the modal that will guide you through the process of saving your cart. As mentioned above you see the *Cart Name* field available to Shop Managers. Click the button to save your cart and get the link to retrieve it.

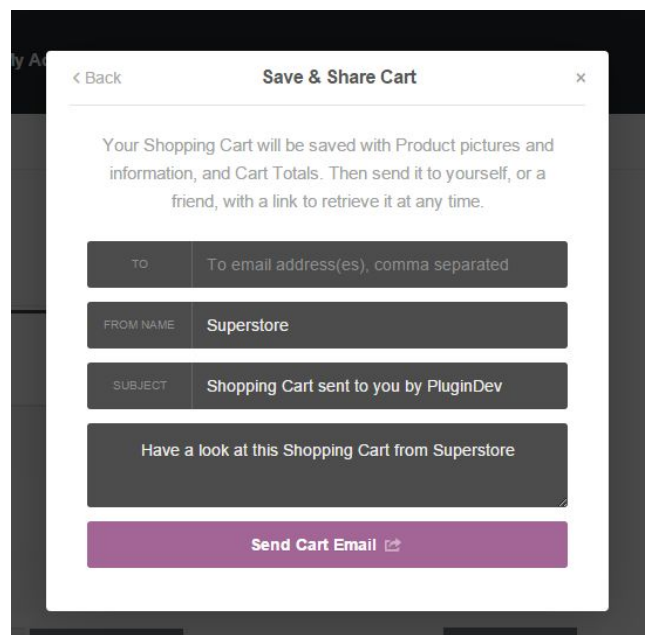

❏ After saving you'll get the unique link to retrieve the cart. At this point you can use copy the link, use it, and click to close. Alternatively you can choose to send the cart in an email by clicking the button.

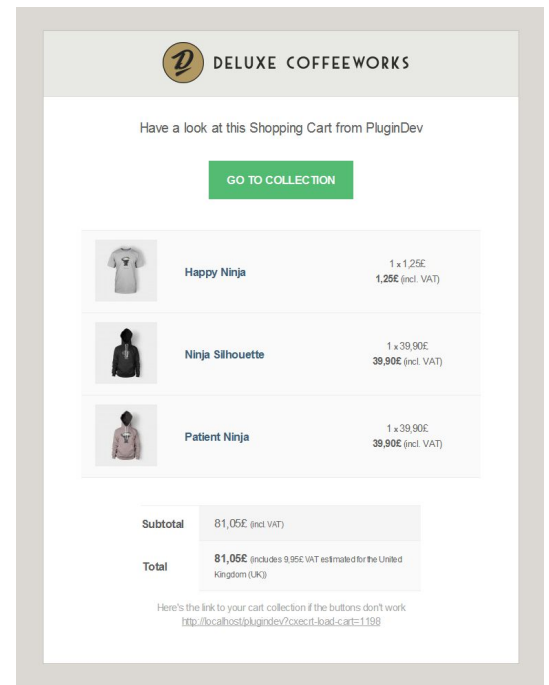

❏ It's worth noting at this point what happens behind-the-scenes: A cart is saved in the list in wp-admin. More on this later.

❏ The email form is designed to make it really quick to use. All it really needs is an email address of the person you're sending to, the rest is pre-filled, but you can also customize any of the other email fields if you'd like. These pre-filled values can also be changed in the settings (see the Settings section).

❏ An email is sent with the details of the cart so the receiver can click on the button to retrieve the cart.

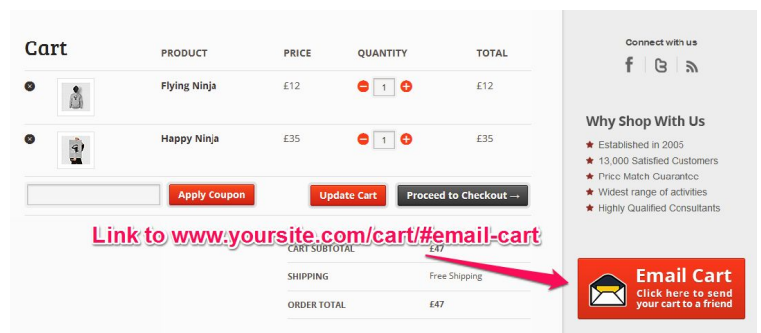

## Plugin Settings
The plugin settings are here: `WooCommerce > Settings > Save & Share Cart`
The settings are thoroughly explained on the page, underneath each option, so please have a look to see the customizations and options that are available.

## Styling the *Save & Share Cart* button
We had a few requests to be able to customize the button on the cart page - here are two solutions to do that:

❏ You can customize the button by css using the class name `.cxecrt-cart-page-button`

❏ You can link to the Save & Share Cart modal/popup by visiting the url `www.your-site.com/cart/#email-cart` This means that you can create a custom link to use anywhere on your site: somewhere else on your Cart page, your Top Nav Menu, your Right Sidebar etc.

Remember you can enable/disable the built-in button here:
`Settings > Save & Share Cart > Show Button on Cart Page [tick/untick]`

# Part 3: Translation

**Translation of our Plugin to your language:**

Go here to get general information about [WordPress Plugin Translation](#).

We recommend using [Loco Translate](#) plugin to do your translations.

To get our plugins to display in your own language creating these .po & .mo files:

- ❏ email-cart-en_US.mo
- ❏ email-cart-en_US.po

Then move both files to either one of the following locations, so they are not overwritten if/when you update our plugin:

- ❏ /wp-content/languages/plugins/
- ❏ /wp-content/languages/

More about this and our other plugins on **CodeCanyon**
